Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Status of Claims

Claims 1-58 are pending in this Office Action.

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 and 50-54, drawn to representing a label switched path with a data structure, classified in class 709, subclass 245.
 - II. Claims 9-14, 18-21 and 56-58, drawn to a method for maintaining network layer switched routes, classified in class 709, subclass 242.
 - III. Claims 15-17, 22-24 and 25-27, drawn to establishing a first and second label switched path, classified in class 709, subclass 238.
 - IV. Claims 28-48, drawn to a data structure, classified in class 707, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in Group I has separate utility such as a method for representing a label switched path with a data structure. See MPEP § 806.05(d). Invention in Group II has separate utility as such a method for maintaining network layer switched routes. Group III has separate utility because it establishes a first and second label switched path. Group IV has separate utility because it provides a data structure.

Art Unit: 2157

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group IV is not required for Groups I, II, and III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2157

Time for Response

Under 35 U.S.C. 133 a shortened statutory **period to reply to this Office Action is set to 30 (thirty) days.**

Conclusion

The inventions are distinct, each from the other because of the following reasons:
